

Arctic Wolf® Aurora™ Endpoint Security

OUTCOME-DRIVEN ENDPOINT SECURITY

Aurora Protect

Stop threats before they disrupt your business with Aurora Protect's market-leading Alpha AI-driven security.

Simple and Effective

Powered by Alpha AI for Endpoint, the market's longest-running predictive model, Aurora Protect prevents attacks before they start.

Built for You

We empower our customers to optimize their security spend by delivering the best performance-to-price ratio for endpoint security solutions in the market.

Security Journey®

Move from tactically responding to your endpoint security to a broader security program to assess, mitigate, and transfer cyber risk.

95% of Arctic Wolf SOC investigations include endpoint telemetry

The Cybersecurity Landscape

Today, organizations are exposed to more cyber risk than ever. In fact, at least seven out of 10 organizations believe that their sensitive data was compromised or breached in the past 12 months.

Organizations have invested their time, energy, and budget on multiple security tools and point solutions to try to solve this challenge. This strategy, however, has yielded negative returns due to alert fatigue, skill shortage, and ineffective security responses.

To address this challenge, what's needed as a foundation is a simple, highly effective endpoint solution and a security operations partner that work together, enabling organizations to spend more time achieving consistent cybersecurity outcomes and building cyber resilience.

Aurora Protect is designed to be easy to use and highly effective even on difficult-to-protect systems, providing AI-driven security to stop endpoint threats before they disrupt your business.

Supported Operating Systems

Microsoft

- Windows 365 (Business, Enterprise)
- Windows 10-11
- Windows Server 2012-2025

Apple

- macOS 11-15

Linux

- Ubuntu 18-24
- Suse Enterprise Server 12, 15
- Red Hat Enterprise 7-9
- CentOS 7-8
- Oracle Server 7-9
- Oracle Server UEK 7-9
- Debian 10-12
- Amazon 2, 2023
- Alma 8-9
- Rocky 8-9

Outcome-Driven Endpoint Security

20x
▼

Powered by Alpha AI for Endpoint, Aurora delivers top-tier efficacy ratings while maintaining ultra-low resource usage — **20x less CPU utilization than competing solutions** — even when offline.

90%
▼

Speed up your investigations and reduce tedious security analyst demands with **30% faster incident investigation and 90% reduction in alert fatigue.**

100%

Provides **100% return on investment**, according to Forrester Total Economic Impact™ Report.
